## Company Profile

Yancheng Tianer Machinery Co., Ltd. was established in 2004 and is located in Chengnan Economic Development Zone, Dafeng District, Yancheng City, Jiangsu Province, known as the "Land of Deer". The company has always focused on the research and development, production, and sales of compressed air post-treatment equipment, and has always adhered to the green development path of "efficiency, stability, environmental protection, and energy conservation".

The company has been awarded titles such as National High tech Enterprise, Provincial Specialized and Innovative Small and Medium sized Enterprise, Provincial Excellent Enterprise in Science and Technology Innovation, Provincial Excellent Brand Award in Machinery Industry, and Provincial Pilot Enterprise for Foreign Trade Integration. The company has also been recognized as the drafting unit of the group standard for "refrigerated compressed air dryers for laser cutting machines".

In the future, we will continue to rely on the development path of "technology+industry" and achieve significant results in areas such as green environmental protection, comprehensive development of marine economy, and medical equipment.

## ► Innovation First

Tianer 天尔

- The enterprise has been awarded the title of high-tech enterprise.
- The enterprise has been recognized as a specialized, refined, unique, and new small and medium-sized enterprise in Jiangsu Province.
- The refrigerated dryer product has won the Jiangsu Province Compressor Industry Science and Technology Progress Contribution Award multiple times.

# Product Certification

Tianer 天尔

**认证证书**

证书号: 11422Q45225R1S

兹证明

**盐城天尔机械有限公司**

统一社会信用代码: 9132098275849392C

注册地址: 盐城市大丰区大中工业园区富康路 23 号

生产办公地址: 江苏省盐城市大丰区大中工业园区富康路 23 号

质量管理体系符合标准

GB/T19001-2016/ISO9001:2015

适用范围

一般用冷冻式压缩空气干燥器 (容积流量 0.5-40m³/min, 压力≤1.6MPa)、一般用吸附式压缩空气干燥器 (容积流量 0.5-40m³/min, 压力≤1.6MPa)、无油静音直联往复空气压缩机 (容积流量 0.1-1m³/min, 压力≤1.25MPa) 的生产

初次发证日期: 2019 年 07 月 24 日

证书换证日期: 2022 年 06 月 22 日

证书有效期至: 2025 年 07 月 22 日

上次认证监督审核日期: 2022 年 05 月 20 日

下次监督审核日期: 2022 年 09 月 04 日 - 05 日

签发: 关卫茹

## ► Production testing equipment

Tianer 天尔

- Fully automatic copper pipe straightening, cutting, and bending machine, combined with a six axis robot arm, completely replaces manual labor and can complete a standard piping operation in an average of 30 seconds.
- Transport vibration test bench, simulating the impact of long-distance transportation vibration on products, ensuring that dryer products can adapt to various transportation road conditions.

## ► Production testing equipment

- The comprehensive performance testing laboratory for dryers, jointly built with Jiangsu University of Science and Technology, automatically generates test reports.
- The laboratory can simulate various practical operating conditions and use multiple dew point data comparisons to ensure the authenticity and accuracy of dew point data.

## ► Production testing equipment

- Integrated vacuum pumping, leak detection, precise refrigerant filling.
- Ensure consistency of each refrigerated dryer to avoid human error.

## ► AGV automatic guided vehicle

Tianer 天尔

- Introducing intelligent unmanned intervention AGV automatic handling vehicles, which automatically transport finished machines that have been taken offline from the production line to designated finished product storage locations, while also transporting raw materials from the warehouse to designated workshop online storage locations, greatly improving production efficiency.

## ► R513A New environmentally friendly refrigerant refrigerated dryer

R513A

R513A The ozone depletion potential (ODP) of refrigerants is 0, which does not cause damage to the ozone layer. Meanwhile, its GWP value is much lower than R134a, which helps to reduce the impact of global warming.

The freezing capacity of R513A refrigerant is equivalent to R134a, which can meet the needs of various refrigeration systems.

The energy efficiency of R513A refrigerant is similar to R134a, ensuring efficient operation of the refrigeration system.

R513A refrigerant is non-toxic and non flammable, meeting the A1 level fire safety requirements of ASHRAE standards, and has high safety during use.

## ➤ R513A new environmentally friendly refrigerant refrigerated dryer

R513A

### TR series

Environment  
protection  
secure

Support R513A new refrigerant, non-toxic,  
non flammable, and does not damage the  
ozone layer

point display function  
Intelligent controller, remote  
monitoring

## ► Tianer intelligent management platform

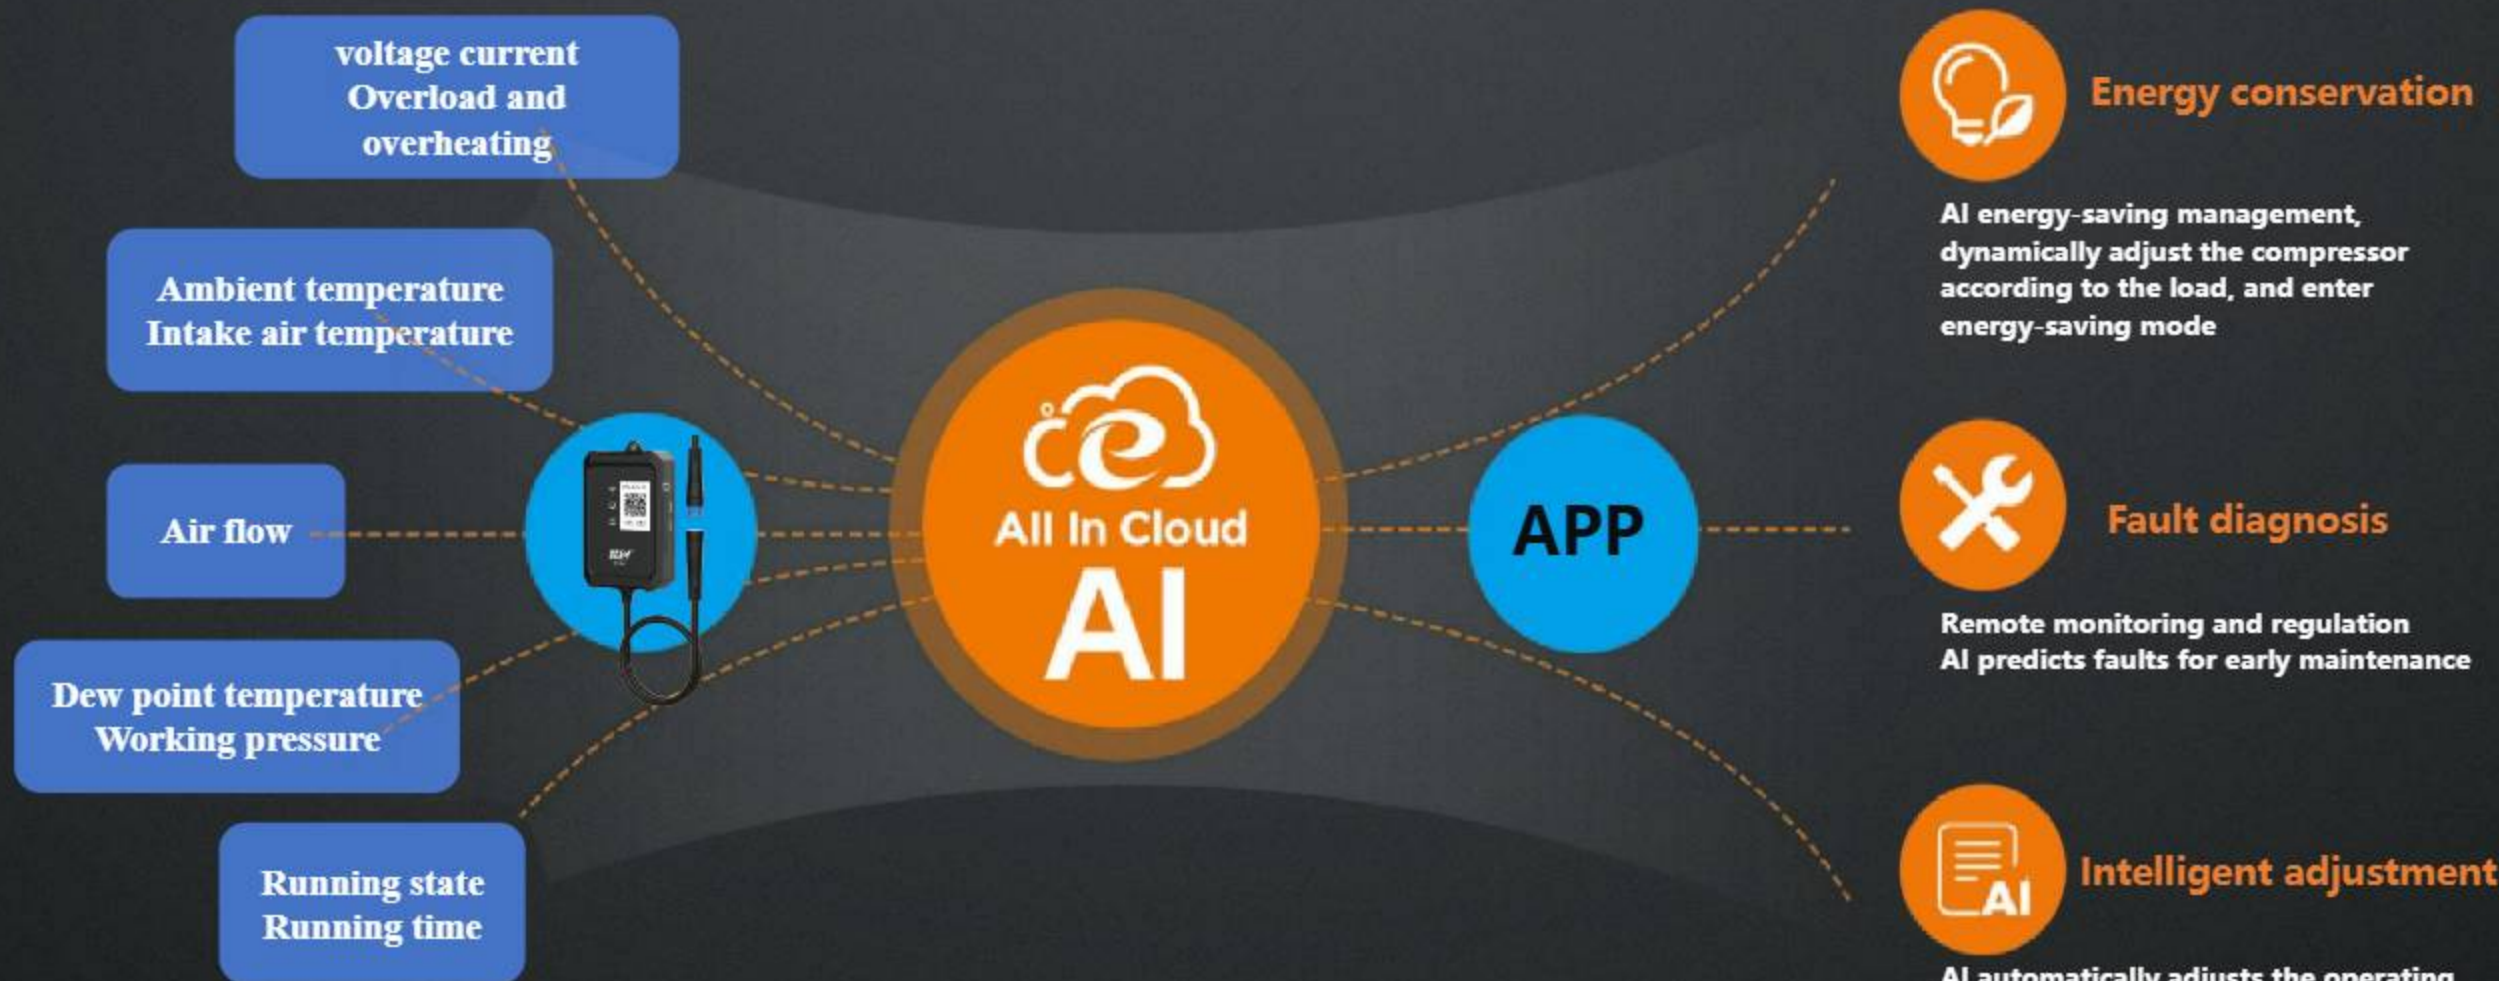

Tianer 天尔

The industrial Internet platform based on multi-source awareness technology uses cloud computing, hardware gateway, big data and other technologies to collect data from industrial equipment to achieve remote control of equipment, remote upgrade of OTA, fault alarm and real-time monitoring, equipment maintenance, predictive maintenance, big data analysis and other functions, so as to provide customers with efficient operation and maintenance cloud services.

## ▶ AI driven intelligent refrigerated dryer

Tianer 天尔

The intelligent refrigeration dryer combined with AI has improved efficiency, user experience, and environmental performance, representing the development direction of future refrigeration equipment

## ► Functional Features

### Real-time Monitoring

- 24-hour uninterrupted monitoring of equipment data to ensure safe operation
- Through Internet technology, managers can access monitoring data remotely, Realize remote monitoring and management

### Data Analysis Report

- Automatically collect and store data, reduce the need for inspection and recording, and improve the efficiency of data management
- Automatically analyze equipment health data and provide operational recommendations

### Warning and alert

- According to different needs, the system can be flexibly configured to adapt to different usage scenarios and environments
- When the preset safety range is exceeded, the system will automatically issue an alarm and promptly notify management personnel to take

### Production safety

- Real time monitoring, timely safety anomalies
- Automatically shut down when abnormalities are detected to prevent equipment damage

### Remote control

Realize remote real-time monitoring and centralized management, reduce the frequency and cost of manual supervision and inspection, and improve operational efficiency.

- Reduce losses and waste caused by equipment malfunctions or improper operation

### Responsibility determination and traceability

- Once a production problem occurs, data can be quickly traced and corresponding measures taken to help clarify responsibility attribution
- Avoid the problem of unclear responsibility determination

Dew point sensor malfunction

# ► Globalization

Tianer 天尔

The platform supports coverage in over 120 countries and regions, remote operation and maintenance, and real-time resolution of customer issues, greatly reducing operation and maintenance costs.

## Multiple remote alarm methods

Tianer 天尔

Notify relevant personnel of faults or abnormal situations in a timely manner through various alarm methods. And it supports multi-level alarm and warning mechanisms, with alarm types that can be flexibly configured according to the rule engine settings.

WeChat official account  
alarm
